Notice anything fishy?

Fri 6:45 pm +00:00, 8 Nov 2024 2

posted by pete fairhurst 2

US Presidential votes cast this century

From Wiki: https://en.wikipedia.org/wiki/Voter_turnout_in_United_States_presidential_elections

Year	Population	Eligible	Voted	% pop	% eligible
2000	209,130,000	194,331,436	105,594,024	50.5%	54.3%
2004	219,508,000	203,483,455	122,349,480	55.7%	60.1%
2008	229,989,000	213,313,508	131,406,895	57.1%	61.6%
2012	240,177,000	222,474,111	129,139,997	53.8%	58.0%
2016	249,422,000	230,931,921	136,787,187	54.8%	59.2%
2020	252,274,000	240,628,443	158,481,688	62.8%	65.9%
2024 *	264,798,961	245,741,673	142,481,880	53.8%	58.0%

Eligible = Number of eligible voters

Voted = Presidential votes actually cast

2020 looks totally out of whack to me

Are we really expected to believe that Trump v Biden in 2020 had 16 million MORE total votes than Harris v Trump in 2024? Biden was already patently senile in 2020

And that, with a population increase of 12 million by 2024, there were 16 million LESS votes cast

In what was being billed in 2024 as “the most pivotal election of the century”

Really? Pull the other one

2020 sticks out like a sore thumb to me

That result is fishier than a fishmongers slab

Look, when you fiddle the figures, it's really difficult to cover everything. Stop picking on us. Could you fiddle it better.

They trial the voting machines in the Philippines – called Smartmatic. Basically you can have whichever result you want. I have met people entering the votes and they say the machine is programmed to give a specific result no matter how people vote.
